

STELLA BELLA

2025 Semillon Sauvignon Blanc

Born and bred in Margaret River, Semillon Sauvignon Blanc harnesses the characteristics of the Margaret River lifestyle and ocean living. Fresh flavours from the elegance of Luminosa vineyard Semillon and the punchy perfume and fruit drive of our Rosa Brook Road vineyard Sauvignon Blanc...a perfect harmony.

Appearance

Pale straw with green hues.

Abundant aromas of...

Lemon sherbet, lime musk and a floral perfume, complemented by subtle hints of pear and stone fruits.

Palate

Instantly pleasing with lovely weight and generous texture. Ripe stone fruit, lemon and lime follow through on the palate. A zesty, refreshing natural acidity and a long sweet fruited finish leaves you wanting another glass.

Enjoyment

A Margaret River classic, freshly caught Augusta King George Whiting.

Oak	100% tank
Cellar	Enjoy while young and vibrant + cellar to 3 years
Alcohol	13.0%
pH	3.20
Acidity	7.02

Place

Our Sauvignon Blanc and Semillon vines are planted throughout our collection of southern Margaret River vineyards. The majority of Semillon is derived from our Luminosa vineyard and Sauvignon Blanc from our Rosa Brook Road vineyard. A multiple personality wine, it represents the uniqueness of each vineyard site while maintaining a defined Stella Bella style.

Vintage 2025

A warm and early La Niña season marked by high humidity, low rainfall and rapid ripening. A warmer-than-usual start to winter in 2024 shortened vine dormancy, reducing yields. The cooler south proved its worth once again, with careful vineyard management ensuring optimal flavour development and retention of natural acidity. The result? Wines with freshness, ripeness, structure and vibrant varietal expression.

Winemaking

Semillon and Sauvignon Blanc were fermented in tank to enhance aroma with already abundant textures from a warmer vintage.
