

# Grappa Fresca

di vinacce aromatiche

*This new line of grappa was created due to the need to propose a distilled product that responds to typical characteristics, peculiar to the vines from which it is extracted, and offers well-balanced perfumes and taste, that are inviting and winning, particularly harmonious and round: a sincere grappa to the palate, with a crystalline aspect. The final result is a decidedly modern, updated version of traditional grappa. To obtain these results, every detail in the preparation of these three new distilled products has been followed with the utmost care and precision. To best enjoy the characteristics of this grappa it should be served in elongated tulip-shaped glasses, at a temperature between 8 and 12°C.*

*Here is a grappa suitable for meditation, an admirable example of a well-balanced distilled product, slightly aromatic, with an inviting perfume and taste.*

*It presents the aromatic characteristics of the vines from which it is produced: Pinot, Moscato, Manzoni cross 6.0.13, without any imperfections whatsoever and with great elegance.*

**Alcohol Content: 40% vol.**  
**Package: 70 cl. bottle**
